Journal of Applied Mechanics

Author Index

All authors of papers published in this volume are listed alphabetically. Full titles are included in each first author's entry. Letters in parentheses follow some of the page numbers: BN indicates Brief Note, D indicates Discussion, E indicates Errata, and BR indicates Book Review.

Abdul-Latif, A., Dingli, J. P., and Saanouni, K. — Elastic-Inelastic Self-Consistent Model for Polycrystals. **69,** 309–316

Akisanya, A. R. — (see Qian, Z. Q.) **69,** 844–852

Amabili, M., and Pellicano, F. — Multimode Approach to Nonlinear Supersonic Flutter of Imperfect Circular Cylindrical Shells. **69,** 117–129

Andersen, L., Nielsen, S. R. K., and Iwankiewicz, R. — Vehicle Moving Along an Infinite Beam With Random Surface Irregularities on a Kelvin Foundation. **69,** 69–75

Angeles, J., and Ostrovskaya, S. — The Proportional-Damping Matrix of Arbitrarily Damped Linear Mechanical Systems. **69,** 649–656

Arruda, E. A. — (see Bischoff, J. E.) **69,** 570–579

Arruda, E. M. — (see Bischoff, J. E.) **69,** 198–201

Baker, S. P., Wang, X., and Hui, C.-Y. — Effect of Nonlinear Elastic Behavior on Bilayer Decohesion of Thin Metal Films From Nonmetal Substrates. **69,** 407–414

Banks-Sills, L. — (see Boniface, V.) **69,** 230–239

Bardet, J. P., and Iai, S. — Axisymmetric Instability of Fluid Saturated Pervious Cylinders. **69,** 717–723

Baskes, M. I. — (see Gerberich, W. W.) **69,** 433–442

Bažant, Z. P. — Scaling of Sea Ice Fracture—Part I: Vertical Penetration. **69,** 11–18

——— Scaling of Sea Ice Fracture—Part II: Horizontal Load From Moving Ice. **69,** 19–24

Berger, J. R. — (see Martin, P. A.) **69,** 740–748

Betti, R. — (see De Angelis, M.) **69,** 617–625

Bhaskar, K., and Ganapathysaran, N. — Elasticity Solution for a Laminated Orthotropic Cylindrical Shell Subjected to a Localized Longitudinal Shear Force. **69,** 700–703(BN)

Bischoff, J. E., Arruda, E. A., and Grosh, K. — A Microstructurally Based Orthotropic Hyperelastic Constitutive Law. **69,** 570–579

———, **Arruda, E. M., and Grosh, K.** — Orthotropic Hyperelasticity in Terms of an Arbitrary Molecular Chain Model. **69,** 198–201

Blevins, R. D. — Non-Gaussian Narrow-Band Random Fatigue. **69,** 317–324

Boniface, V., and Banks-Sills, L. — Stress Intensity Factors for Finite Interface Cracks Between a Special Pair of Transversely Isotropic Materials. **69,** 230–239

Briggs, J. P., and Castaneda, P. Ponte — Variational Estimates for the Effective Response of Shape Memory Alloy Actuated Fiber Composites. **69,** 470–480

Brock, L. M. — Exact Analysis of Dynamic Sliding Indentation at any Constant Speed on an Orthotropic or Transversely Isotropic Half-Space. **69,** 340–345

——— Dynamic Shear Fracture at Subsonic and Transonic Speeds in a Compressible Neo-Hookean Material Under Compressive Prestress. **69,** 663–670

Buryachenko, V. A., Rammerstorfer, F. G., and Plankensteiner, A. F. — A Local Theory of Elastoplastic Deformation of Two-Phase Metal Matrix Random Structure Composites. **69,** 489–496

Cammarata, R. C., and Sieradzki, K. — Thermodynamics of Thin Film Epitaxy. **69,** 415–418

Carpinteri, A., and Pugno, N. — One, Two, and Three-Dimensional Universal Laws for Fragmentation due to Impact and Explosion. **69,** 854–856(BN)

Castaneda, P. Ponte — (see Briggs, J. P.) **69,** 470–480

Chandrasekar, S. — (see Li, Z. Y.) **69,** 394–396(BN)

Chan Man Fong, C. F. — (see De Kee, D.) **69,** 703–704(BN)

Chao, C.-K. — (see Wang, C.-H.) **69,** 36–44

Chen, C.-Q. — (see Chen, T.-C.) **69,** 556–563(BN)

Chen, G. — (see Zhang, X. R.) **69,** 254–260

Chen, T., and Kung, Y. J. — A Closed Contour With No Warping: A Common Feature in all Confocally Elliptical Hollow Sections. **69,** 859–862(BN)

Chen, T.-C., Hwang, S.-J., and Chen, C.-Q. — Nonlinear Time-Dependent Thermoelastic Response in a Multilayered Anisotropic Medium. **69,** 556–563(BN)

Chen, W., Lu, F., Frew, D. J., and Forrestal, M. J. — Dynamic Compression Testing of Soft Materials. **69,** 214–223

Chen, Y. Z., and Lee, K. Y. — Some Properties of *J*-Integral in Plane Elasticity. **69,** 195–198

———, **and Lee, K. Y.** — An Infinite Plate Weakened by Periodic Cracks. **69,** 552–555(BN)

———, **and Lee, K. Y.** — Discussion: "On the Relationship Between the L-Integral and the Bueckner Work-Conjugate Integral" (Shi, J. P., Liu, X. H., and Li, J., 2000 ASME J. Appl. Mech., **67**, pp. 828–829). **69,** 711(D)

Chin, C.-M. — (see Lacarbonara, W.) **69,** 325–334

Cho, K. — (see Peng, S.) **69,** 451–453

Christensen, R. M. — A Possible Limiting Case Behavior for Brittle Material Fracture. **69,** 772–774

Copper, C. D., and Pilkey, W. D. — Thermoelasticity Solutions for Straight Beams. **69,** 224–229

Dafedar, J. B., and Desai, Y. M. — Thermomechanical Buckling of Laminated Composite Plates Using Mixed, Higher-Order Analytical Formulation. **69,** 790–799

Dag, S., and Erdogan, F. — A Surface Crack in a Graded Medium Under General Loading Conditions. **69,** 580–588

Datta, S. K. — (see Niklasson, A. J.) **69,** 811–818

De Angelis, M., Luş, H., Betti, R., and Longman, R. W. — Extracting Physical Parameters of Mechanical Models From Identified State-Space Representations. **69,** 617–625

De Kee, D., Chan Man Fong, C. F., and Yao, J. — Bubble Shape in Non-Newtonian Fluids. **69,** 703–704(BN)

Deng, M. L. — (see Zhu, W. Q.) **69,** 274–282

Desai, Y. M. — (see Dafedar, J. B.) **69,** 790–799

DeSmidt, H. A., Wang, K. W., and Smith, E. C. — Coupled Torsion-Lateral Stability of a Shaft-Disk System Driven Through a Universal Joint. **69,** 261–273

Dimentberg, M. F., and Lin, Y. K. — An Exact Solution for Response Spectral Density of a Single-Degree-of-Freedom System Under Both Parametric and Additive White Noise Excitations. **69,** 399–400(BN)

Dingli, J. P. — (see Abdul-Latif, A.) **69,** 309–316

Dodds, R. H., Jr. — (see Jin, Z.-H.) **69,** 370–379

Du, S.-Y. — (see Zhou, Z.-G.) **69,** 388–390

Duan, J. — (see Wan, K.-T.) **69,** 104–109
Duan, Z. — (see Li, C.) **69,** 303–308
Durban, D. — (see Karp, B.) **69,** 515–520
Dvorak, G. J. — (see Suvorov, A. P.) **69,** 459–469

Ehsani, M. — (see Towfighi, S.) **69,** 283–291
Erdogan, F. — (see Dag, S.) **69,** 580–588
Etsion, I. — (see Kogut, L.) **69,** 657–662
Evangelou, S. — (see Limebeer, D. J. N.) **69,** 724–739

Feng, Z. C., He, B., and Lombardo, S. J. — Stress Distribution in Porous Ceramic Bodies During Binder Burnout. **69,** 497–501
Forrestal, M. J., and Hanchak, S. J. — Penetration Limit Velocity for Ogive-Nose Projectiles and Limestone Targets. **69,** 853–854(BN)
_____ (see Chen, W.) **69,** 214–223
Frew, D. J. — (see Chen, W.) **69,** 214–223
Fu, G. — Normal Indentation of Elastic Half-Space With a Rigid Frictionless Axisymmetric Punch. **69,** 142–147

Gan, S. — (see Wang, X. D.) **69,** 696–699(BN)
Ganapathysaran, N. — (see Bhaskar, K.) **69,** 700–703(BN)
Gao, H. — (see Gill, S. P. A.) **69,** 425–432
_____ (see Huang, Y.) **69,** 76–80
_____ (see Zhang, P.) **69,** 454–458
Gao, Huajian — (see Kouris, Demitris) **69,** 405–406
Gao, X.-W. — A Boundary Element Method Without Internal Cells for Two-Dimensional and Three-Dimensional Elastoplastic Problems. **69,** 154–160
Gao, Y. F., and Suo, Z. — Domain Dynamics in a Ferroelastic Epilayer on a Paraelastic Substrate. **69,** 419–424
Garion, C., and Skoczen, B. — Modeling of Plastic Strain-Induced Martensitic Transformation for Cryogenic Applications. **69,** 755–762
Gerberich, W. W., Tymiak, N. I., Grunlan, J. C., Horstemeyer, M. F., and Baskes, M. I. — Interpretations of Indentation Size Effects. **69,** 433–442
Gill, S. P. A., Gao, H., Ramaswamy, V., and Nix, W. D. — Confined Capillary Stresses During the Initial Growth of Thin Films on Amorphous Substrates. **69,** 425–432
Gover, M. J. C. — (see Horton, J. M.) **69,** 836–843
Grosh, K. — (see Bischoff, J. E.) **69,** 198–201
_____ (see Bischoff, J. E.) **69,** 570–579
Grunlan, J. C. — (see Gerberich, W. W.) **69,** 433–442
Guo, T. F. — (see Jiang, H.) **69,** 139–141

Hanchak, S. J. — (see Forrestal, M. J.) **69,** 853–854(BN)
Hansen, M. H. — (see Raman, A.) **69,** 864–866(BN)
Hao, T.-H. — Displacement Boundary Value Problem of Piezoelectric Material Plane With an Elliptic Hole. **69,** 521–526
Hasheminejad, S. M., and Hosseini, H. — Radiation Loading of a Cylindrical Source in a Fluid-Filled Cylindrical Cavity Embedded Within a Fluid-Saturated Poroelastic Medium. **69,** 675–683
He, B. — (see Feng, Z. C.) **69,** 497–501
Helsing, J., and Jonsson, A. — On the Accuracy of Benchmark Tables and Graphical Results in the Applied Mechanics Literature. **69,** 88–90(BN)
Horstemeyer, M. F. — (see Gerberich, W. W.) **69,** 433–442
Horton, J. M., Tupholme, G. E., and Gover, M. J. C. — Axial Loading of Bonded Rubber Blocks. **69,** 836–843
Hosseini, H. — (see Hasheminejad, S. M.) **69,** 675–683
Huang, C. S. — On the Singularity Induced by Boundary Conditions in a Third-Order Thick Plate Theory. **69,** 800–810
Huang, W. — (see Tong, P.) **69,** 785–789
Huang, Y., and Gao, H. — Intersonic Crack Propagation—Part II: Suddenly Stopping Crack. **69,** 76–80
_____ (see Jiang, H.) **69,** 139–141
_____ (see Zhang, P.) **69,** 454–458
Huang, Z. L. — (see Zhu, W. Q.) **69,** 274–282
Huang, Z.-M. — Discussion: "Computationally Efficient Micromechanical Models for Woven Fabric Composite Elastic Moduli" (Tanov, R., and Tabiei, A., 2001, ASME J. Appl. Mech., **68,** pp. 533-560). **69,** 867(D)
Hui, C.-Y. — (see Baker, S. P.) **69,** 407–414
Hutchinson, J. W. — (see Volokh, K. Yu.) **69,** 862–863(BN)
Hwang, K. C. — (see Jiang, H.) **69,** 139–141
_____ (see Zhang, P.) **69,** 454–458
Hwang, S.-J. — (see Chen, T.-C.) **69,** 556–563(BN)

Iai, S. — (see Bardet, J. P.) **69,** 717–723
Ilanko, S. — Vibration and Post-buckling of In-Plane Loaded Rectangular Plates Using a Multiterm Galerkin's Method. **69,** 589–592
Iwankiewicz, R. — (see Andersen, L.) **69,** 69–75

Jiang, H., Huang, Y., Guo, T. F., and Hwang, K. C. — An Alternative Decomposition of the Strain Gradient Tensor. **69,** 139–141
Jin, J. — (see Wang, Q.) **69,** 391–394
Jin, Z.-H., Paulino, G. H., and Dodds, R. H., Jr. — Finite Element Investigation of Quasi-Static Crack Growth in Functionally Graded Materials Using a Novel Cohesive Zone Fracture Model. **69,** 370–379
Jonsson, A. — (see Helsing, J.) **69,** 88–90(BN)

Kalaba, R. E. — (see Udwadia, F. E.) **69,** 335–339
Karp, B., and Durban, D. — Influence of Boundary Conditions on Decay Rates in a Prestrained Plate. **69,** 515–520
Keer, L. M. — (see Wen, S.) **69,** 1–10
Kim, Jeong-Ho, and Paulino, G. H. — Isoparametric Graded Finite Elements for Nonhomogeneous Isotropic and Orthotropic Materials. **69,** 502–514
Kim, K. J. — (see Robinson, D. N.) **69,** 641–648
Ko, J. M. — (see Ni, Y. Q.) **69,** 171–178
Kogut, L., and Etsion, I. — Elastic-Plastic Contact Analysis of a Sphere and a Rigid Flat. **69,** 657–662
Kotulski, Z. — (see Szczepinski, W.) **69,** 91(BR)
Kouris, D. — (see Kukta, R.) **69,** 443–450
Kouris, Demitris, and Gao, Huajian — NANOMECHANICS OF SURFACES AND INTERFACES. **69,** 405–406
Krenk, S., Lin, Y. K., and Rüdinger, F. — Effective System Properties and Special Density in Random Vibration With Parametric Excitation. **69,** 161–170
Kukta, R., Peralta, A., and Kouris, D. — Surface Steps: From Atomistics to Continuum. **69,** 443–450
Kundu, T. — (see Towfighi, S.) **69,** 283–291
Kung, Y. J. — (see Chen, T.) **69,** 859–862(BN)
Kwon, J. H., and Lee, K. Y. — Electromechanical Effects of a Screw Dislocation Around a Finite Crack in a Piezoelectric Material. **69,** 55–62
Kyriakides, Stelios — Robert M. McMeeking Appointed Editor of the *Journal of Applied Mechanics*. **69,** 213

Lacarbonara, W., Chin, C.-M., and Soper, R. R. — Open-Loop Nonlinear Vibration Control of Shallow Arches via Perturbation Approach. **69,** 325–334
Lardner, T. J. — Resonance and the Aging Spring. **69,** 397–398(BN)
Leamy, M. J., and Wasfy, T. M. — Analysis of Belt-Drive Mechanics Using a Creep-Rate-Dependent Friction Law. **69,** 763–771

Lee, J. — Comparison of the Two Formulations of *w-u-v* and *w-F* in Nonlinear Plate Analysis. **69,** 547–552(BN)
Lee, K. Y. — (see Chen, Y. Z.) **69,** 195–198
____ (see Chen, Y. Z.) **69,** 552–555(BN)
____ (see Chen, Y. Z.) **69,** 711(D)
____ (see Kwon, J. H.) **69,** 55–62
Lee, M. — (see Lee, S.-Y.) **69,** 83–87(BN)
Lee, S.-Y., and Lee, M. — A New Wave Technique for Free Vibration of a String With Time-Varying Length. **69,** 83–87(BN)
Lee, Y. M., and Wickert, J. A. — Stress Field in Finite Width Axisymmetric Wound Rolls. **69,** 130–138
____, **and Wickert, J. A.** — Width-Wise Variation of Magnetic Tape Pack Stresses. **69,** 358–369
Leech, C. M. — (see Tabarrok, B.) **69,** 749–754
Levy, A. J. — A Note on the Application of the Flamant Solution of Classical Elasticity to Circular Domains. **69,** 856–858(BN)
Li, C., Duan, Z., and Zou, Z. — Torsional Impact Response of a Penny-Shaped Interface Crack in Bonded Materials With a Graded Material Interlayer. **69,** 303–308
Li, Chunyu, and Weng, G. J. — Antiplane Crack Problem in Functionally Graded Piezoelectric Materials. **69,** 481–488
Li, Z. Y., Chandrasekar, S., and Yang, H. T. — A Generalized Load-Penetration Relation for Sharp Indenters and the Indentation Size Effect. **69,** 394–396(BN)
Limebeer, D. J. N., Sharp, R. S., and Evangelou, S. — Motorcycle Steering Oscillations due to Road Profiling. **69,** 724–739
Lin, Y. K. — (see Dimentberg, M. F.) **69,** 399–400(BN)
____ (see Krenk, S.) **69,** 161–170
Lissenden, C. J. — Discussion: "A Critical Reexamination of Classical Metal Plasticity" (Wilson, C.D., 2002, ASME J. Appl. Mech., **69**, pp. 63–68). **69,** 712(D)
Lombardo, S. J. — (see Feng, Z. C.) **69,** 497–501
Longman, R. W. — (see De Angelis, M.) **69,** 617–625
Lu, F. — (see Chen, W.) **69,** 214–223
Luş, H. — (see De Angelis, M.) **69,** 617–625

Mai, Y. W. — (see Wang, B. L.) **69,** 539–546
Maier, G. — Erratum: "On Some Issues in Shakedown Analysis" [ASME J. Appl. Mech., 2001, **68**, pp. 799–808]. **69,** 713(E)
Martin, P. A., and Berger, J. R. — On Mechanical Waves Along Aluminum Conductor Steel Reinforced (ACSR) Power Lines. **69,** 740–748
McMeeking, Robert M. — Editorial. **69,** 569
Meguid, S. A., and Zhao, X. — The Interface Crack Problem of Bonded Piezoelectric and Elastic Half-Space Under Transient Electromechanical Loads. **69,** 244–253
Moon, T. J. — (see Yee, K.-C.) **69,** 632–640
Mote,, C. D., Jr. — (see Raman, A.) **69,** 864–866(BN)
Moyer, E. T., Jr. — (see Yavari, A.) **69,** 45–54

Nath, Y. — (see Shukla, K. K.) **69,** 684–692
Ni, Y. Q., Ying, Z. G., and Ko, J. M. — Random Response Analysis of Preisach Hysteretic Systems With Symmetric Weight Distribution. **69,** 171–178
Nielsen, S. R. K. — (see Andersen, L.) **69,** 69–75
Niklasson, A. J., and Datta, S. K. — Transient Ultrasonic Waves in Multilayered Superconducting Plates. **69,** 811–818
Nix, W. D. — (see Gill, S. P. A.) **69,** 425–432
Noda, N. A. — (see Qin, T. Y.) **69,** 626–631

Ogawa, A. — (see Zhou, F.) **69,** 81–83(BN)
Ostoja-Starzewski, M. — Microstructural Randomness Versus Representative Volume Element in Thermomechanics. **69,** 25–35
Ostoja–Starzewski, M. — (see Szczepinski, W.) **69,** 91(BR)
Ostrovskaya, S. — (see Angeles, J.) **69,** 649–656

Parameswaran, V., and Shukla, A. — Asymptotic Stress Fields for Stationary Cracks Along the Gradient in Functionally Graded Materials. **69,** 240–243
Paulino, G. H. — (see Jin, Z.-H.) **69,** 370–379
____ (see Kim, Jeong-Ho) **69,** 502–514
Pellicano, F. — (see Amabili, M.) **69,** 117–129
Peng, S., and Cho, K. — Nano Electro Mechanics of Semiconducting Carbon Nanotube. **69,** 451–453
Peralta, A. — (see Kukta, R.) **69,** 443–450
Pilkey, W. D. — (see Copper, C. D.) **69,** 224–229
Plankensteiner, A. F. — (see Buryachenko, V. A.) **69,** 489–496
Pugno, N. — (see Carpinteri, A.) **69,** 854–856(BN)

Qian, Z. Q., Akisanya, A. R., and Thompson, D. S. — Stress Behavior at the Interface Junction of an Elastic Inclusion. **69,** 844–852
Qin, T. Y., and Noda, N. A. — Analysis of a Three-Dimensional Crack Terminating at an Interface Using a Hypersingular Integral Equation Method. **69,** 626–631
Quek, S. T. — (see Wang, Q.) **69,** 391–394

Rahman, M. — The Isotropic Ellipsoidal Inclusion With a Polynomial Distribution of Eigenstrain. **69,** 593–601
Raman, A., Hansen, M. H., and Mote,, C. D., Jr. — A Note on the Post-Flutter Dynamics of a Rotating Disk. **69,** 864–866(BN)
Ramaswamy, V. — (see Gill, S. P. A.) **69,** 425–432
Rammerstorfer, F. G. — (see Buryachenko, V. A.) **69,** 489–496
Rao, G. Visweswara — Dynamic Condensation and Synthesis of Unsymmetric Structural Systems. **69,** 610–616
Robinson, D. N., Kim, K. J., and White, J. L. — Constitutive Model of a Transversely Isotropic Bingham Fluid. **69,** 641–648
Roy, A. — (see Saha, T. K.) **69,** 775–784
Ru, C. Q. — Surface Instability of an Elastic Thin Film Interacting With a Suspended Elastic Plate. **69,** 97–103
Rüdinger, F. — (see Krenk, S.) **69,** 161–170

Saanouni, K. — (see Abdul-Latif, A.) **69,** 309–316
Saha, T. K., and Roy, A. — Scattering From an Elliptic Crack by an Integral Equation Method: Normal Loading. **69,** 775–784
Sarkani, S. — (see Yavari, A.) **69,** 45–54
Scarpetta, E., and Sumbatyan, M. A. — In-Plane Wave Propagation Through Elastic Solids With a Periodic Array of Rectangular Defects. **69,** 179–188
Schiavone, P. — On an Elastic Circular Inhomogeneity With Imperfect Interface in Antiplane Shear. **69,** 671–674
Sharp, R. S. — (see Limebeer, D. J. N.) **69,** 724–739
Shaw, J. A. — (see Wineman, A. S.) **69,** 602–609
Shen, Y.-p. — (see Wang, X.) **69,** 527–538
Shukla, A. — (see Parameswaran, V.) **69,** 240–243
Shukla, K. K., and Nath, Y. — Buckling of Laminated Composite Rectangular Plates Under Transient Thermal Loading. **69,** 684–692
Sieradzki, K. — (see Cammarata, R. C.) **69,** 415–418
Skoczen, B. — (see Garion, C.) **69,** 755–762
Smith, E. C. — (see DeSmidt, H. A.) **69,** 261–273
Soper, R. R. — (see Lacarbonara, W.) **69,** 325–334
Spiliopoulos, K. V. — A Simplified Method to Predict the Steady Cyclic Stress State of Creeping Structures. **69,** 148–153
Sumbatyan, M. A. — (see Scarpetta, E.) **69,** 179–188
Suo, Z. — (see Gao, Y. F.) **69,** 419–424
Suvorov, A. P., and Dvorak, G. J. — Stress Relaxation in Prestressed Composite Laminates. **69,** 459–469

Szczepinski, W., Kotulski, Z., and Ostoja-Starzewski, M. — Error Analysis With Applications in Engineering. **69,** 91(BR)

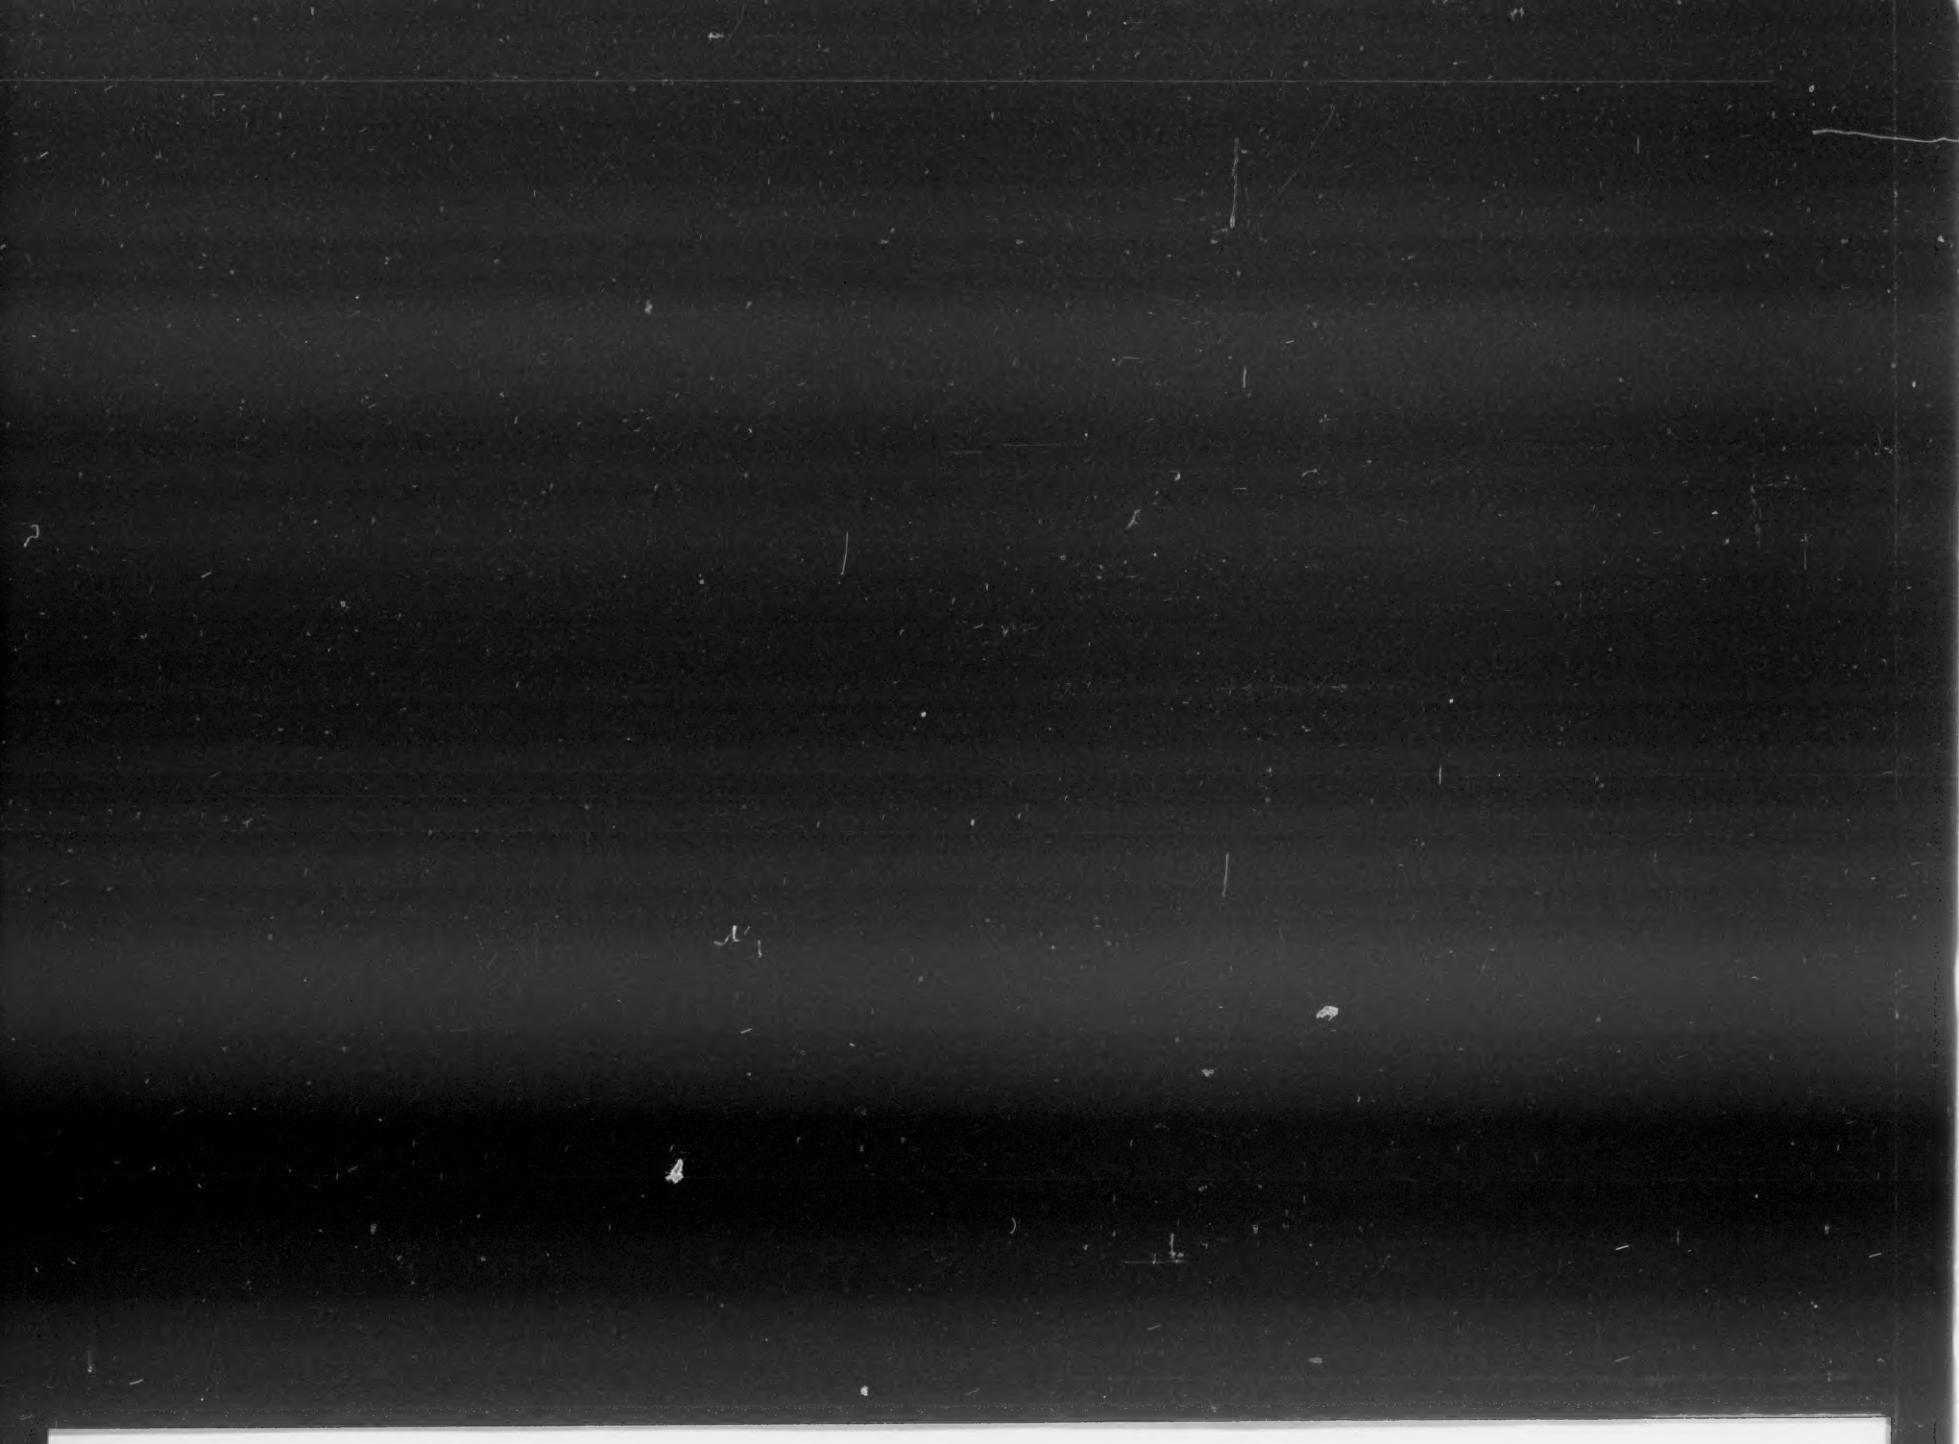
Tabarrok, B., and Leech, C. M. — Hamiltonian Mechanics for Functionals Involving Second-Order Derivatives. **69,** 749–754
Tabiei, A. — (see Tanov, R.) **69,** 868
Tanov, R., and Tabiei, A. — Closure to "Discussion of 'Computationally Efficient Micromechanical Models for Woven Fabric Composite Elastic Moduli' " (2002, ASME J. Appl. Mech., **69**, p. 867). **69,** 868
Tao, M., and Zhang, W. — Dynamic Stability of a Rotor Partially Filled With a Viscous Liquid. **69,** 705–707(BN)
_____ **, and Zhang, W.** — Dynamic Stability of a Flexible Spinning Cylinder Partially Filled With Liquid. **69,** 708–710(BN)
Thompson, D. S. — (see Qian, Z. Q.) **69,** 844–852
Tong, P., and Huang, W. — Large Deflection of Thin Plates in Pressure Sensor Applications. **69,** 785–789
Towfighi, S., Kundu, T., and Ehsani, M. — Elastic Wave Propagation in Circumferential Direction in Anisotropic Cylindrical Curved Plates. **69,** 283–291
Tupholme, G. E. — (see Horton, J. M.) **69,** 836–843
Tymiak, N. I. — (see Gerberich, W. W.) **69,** 433–442

Udwadia, F. E., and Kalaba, R. E. — What is the General Form of the Explicit Equations of Motion for Constrained Mechanical Systems? **69,** 335–339

Volokh, K. Yu., and Hutchinson, J. W. — Are Lower-Order Gradient Theories of Plasticity Really Lower Order? **69,** 862–863(BN)

Wan, K.-T. — Adherence of an Axisymmetric Flat Punch Onto a Clamped Circular Plate: Transition From a Rigid Plate to a Flexible Membrane. **69,** 110–116
_____ **, and Duan, J.** — Adherence of a Rectangular Flat Punch Onto a Clamped Plate: Transition From a Rigid Plate to a Flexible Membrane. **69,** 104–109
Wang, B. — (see Zhou, Z.-G.) **69,** 388–390
Wang, B. L., and Mai, Y. W. — A Cracked Piezoelectric Material Strip Under Transient Thermal Loading. **69,** 539–546
Wang, C.-H., and Chao, C.-K. — On Perturbation Solutions for Nearly Circular Inclusion Problems in Plane Thermoelasticity. **69,** 36–44
Wang, C. Y. — Low Reynolds Number Slip Flow in a Curved Rectangular Duct. **69,** 189–194
Wang, K. W. — (see DeSmidt, H. A.) **69,** 261–273
Wang, Q. — Wave Propagation in a Piezoelectric Coupled Solid Medium. **69,** 819–824
_____ **, Jin, J., and Quek, S. T.** — Propagation of a Shear Direction Acoustic Wave in Piezoelectric Coupled Cylinders. **69,** 391–394
Wang, X., and Shen, Y.-p. — An Edge Dislocation in a Three-Phase Composite Cylinder Model With a Sliding Interface. **69,** 527–538
_____ (see Baker, S. P.) **69,** 407–414
Wang, X. D., and Gan, S. — Effective Antiplane Dynamic Properties of Fiber-Reinforced Composites. **69,** 696–699(BN)
Wasfy, T. M. — (see Leamy, M. J.) **69,** 763–771
Wen, S., and Keer, L. M. — A Theory of Fatigue: A Physical Approach With Application to Lead-Rich Solder. **69,** 1–10
Weng, G. J. — (see Li, Chunyu) **69,** 481–488
_____ (see Zhao, Y. H.) **69,** 292–302
White, J. L. — (see Robinson, D. N.) **69,** 641–648
Wickert, J. A. — (see Lee, Y. M.) **69,** 130–138
_____ (see Lee, Y. M.) **69,** 358–369
Wilson, C. D. — A Critical Reexamination of Classical Metal Plasticity. **69,** 63–68
Wineman, A. S., and Shaw, J. A. — Scission and Healing in a Spinning Elastomeric Cylinder at Elevated Temperature. **69,** 602–609
Wu, J. — Crack-Tip Field of a Supersonic Bimaterial Interface Crack. **69,** 693–696(BN)

Xie, W.-C. — Moment Lyapunov Exponents of a Two-Dimensional Viscoelastic System Under Bounded Noise Excitation. **69,** 346–357
Xu, X. — (see Zhang, X. R.) **69,** 254–260

Yang, H. T. — (see Li, Z. Y.) **69,** 394–396(BN)
Yao, J. — (see De Kee, D.) **69,** 703–704(BN)
Yavari, A., Sarkani, S., and Moyer, E. T., Jr. — On Fractal Cracks in Micropolar Elastic Solids. **69,** 45–54
Yee, K.-C., and Moon, T. J. — Plane Thermal Stress Analysis of an Orthotropic Cylinder Subjected to an Arbitrary, Transient, Asymmetric Temperature Distribution. **69,** 632–640
Yin, X. C., and Yue, Z. Q. — Transient Plane-Strain Response of Multilayered Elastic Cylinders to Axisymmetric Impulse. **69,** 825–835
Ying, Z. G. — (see Ni, Y. Q.) **69,** 171–178
Yoo, J. — Reduction of Vibration Caused by Magnetic Force in a Switched Reluctance Motor by Topology Optimization. **69,** 380–387
Yue, Z. Q. — (see Yin, X. C.) **69,** 825–835


Zhang, P., Huang, Y., Gao, H., and Hwang, K. C. — Fracture Nucleation in Single-Wall Carbon Nanotubes Under Tension: A Continuum Analysis Incorporating Interatomic Potentials. **69,** 454–458
Zhang, W. — (see Tao, M.) **69,** 705–707(BN)
_____ (see Tao, M.) **69,** 708–710(BN)
Zhang, X. R., Chen, G., and Xu, X. — Numerical Simulation of Pulsed Laser Bending. **69,** 254–260
Zhao, X. — (see Meguid, S. A.) **69,** 244–253
Zhao, Y. H., and Weng, G. J. — The Effect of Debonding Angle on the Reduction of Effective Moduli of Particle and Fiber-Reinforced Composites. **69,** 292–302
Zhou, F., and Ogawa, A. — Elastic Solutions for a Solid Rotating Disk With Cubic Anisotropy. **69,** 81–83(BN)
Zhou, Z.-G., Wang, B., and Du, S.-Y. — Investigation of Antiplane Shear Behavior of Two Collinear Permeable Cracks in a Piezoelectric Material by Using the Nonlocal Theory. **69,** 388–390
Zhu, W. Q., Deng, M. L., and Huang, Z. L. — First-Passage Failure of Quasi-Integrable Hamiltonian Systems. **69,** 274–282
Zou, Z. — (see Li, C.) **69,** 303–308
